

How to calculate your percentile.

You get to input your scores on Career Avenues website only for a specific timeframe. The following is the list of percentiles based upon how people who submitted their scores before time have fared.

To calculate your percentile, just check the corresponding score to your score, for each section and for overall percentile.

For e.g. If you have scored 15 in Part A, 12 in Part B and 20 in Part C with 47 overall, then your percentile would be

Part A – approx 70.

Part B – approx 54.

Part C – approx 81

Overall – approx 67.5

\* Although this percentile is not accurate, it would be a fairly good indicator.

Total Part A	Percentile Part A		Total Part B	Percentile Part B		Total Part C	Percentile Part C		Overall Total	Final Percentile
24.0	95.54		32.7	100		29.3	97.16		86.0	100
